BEEF SEMEN | 2014

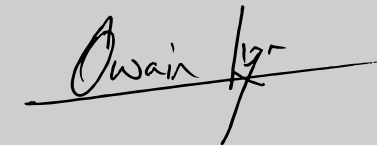

I am delighted to present you with our 2014 beef semen catalogue.

We are the UK semen agents for KBS, France and NCBC, Ireland.

It is for this reason we can offer beef semen of the highest quality to meet the requirements of pedigree and commercial breeders.

We are exporters of top quality finished cattle to the continent and importers of pedigree cattle from France and Belgium. We specialise in buying high quality breeding and store cattle for customers. We also have our own beef finishing unit.

Consequently we are in a unique position to understand the needs of beef producers and the ever changing requirements of the UK and European beef markets.
